Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6 February 2006 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-5, 7-11 and 13-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Klosterman et al. (US005940073A).
4. Klosterman et al. teaches (independent claims 1, 7 and 13) a method, computer readable storage medium and apparatus, the method comprising: maintaining an electronic program guide (EPG) for broadcast content (col. 5 lines 48-53); receiving content information (col. 4 lines 63-67) from a content service provider (*distribution center*, col. 4 lines 29-35) for one or more stored content data files (the content stored in the receiving devices, col. 4 lines 53-62); allowing the content service provider to determine a number of line items (e.g., information region **220**) in an EPG to represent the content information for the one or more stored content data files (col. 5 lines 53-57) and allocating the determined number of line items in the EPG (Fig. 2(a)); allowing a user access to the one or more stored content data files (e.g., item **260** in Fig. 2(b)) via the electronic program guide (Fig. 2(a)) by linking, which reads on merging, the content information for display in the determined number of line

items, wherein the EPG includes the content information for the one or more stored content data files and content information for the broadcast content (col. 5 lines 64-66 and col. 6 lines 5-15 and 47-54); and charging each of the one or more service providers a predetermined amount for each allocated line item (col. 6 lines 34-36 and 54-57).

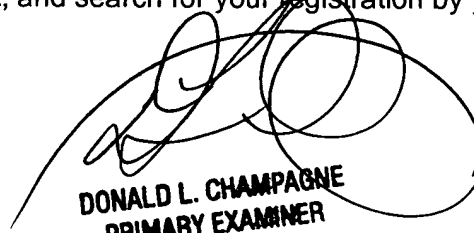

5. Klosterman et al. also teaches at the citations given above claims 2, 8, and 14; and claims 4, 10 and 16, where the content service provider is *NBC* and the allocated line item is item **220** in Fig. 2(a)).
6. Klosterman et al. also teaches claims 3, 9 and 15 (col. 11 lines 22-27, where *National News* in Fig. 9(a) is a category and Fig. 9(b) shows its allocated line items); and claims 5, 11 and 17 (col. 2 line 3 and col. 12 lines 12-20).
